

**Implementing DevOps with rigorous QA for one of the world's largest independent alternative asset management firms to dramatically decrease the time to market for their strategic customers**

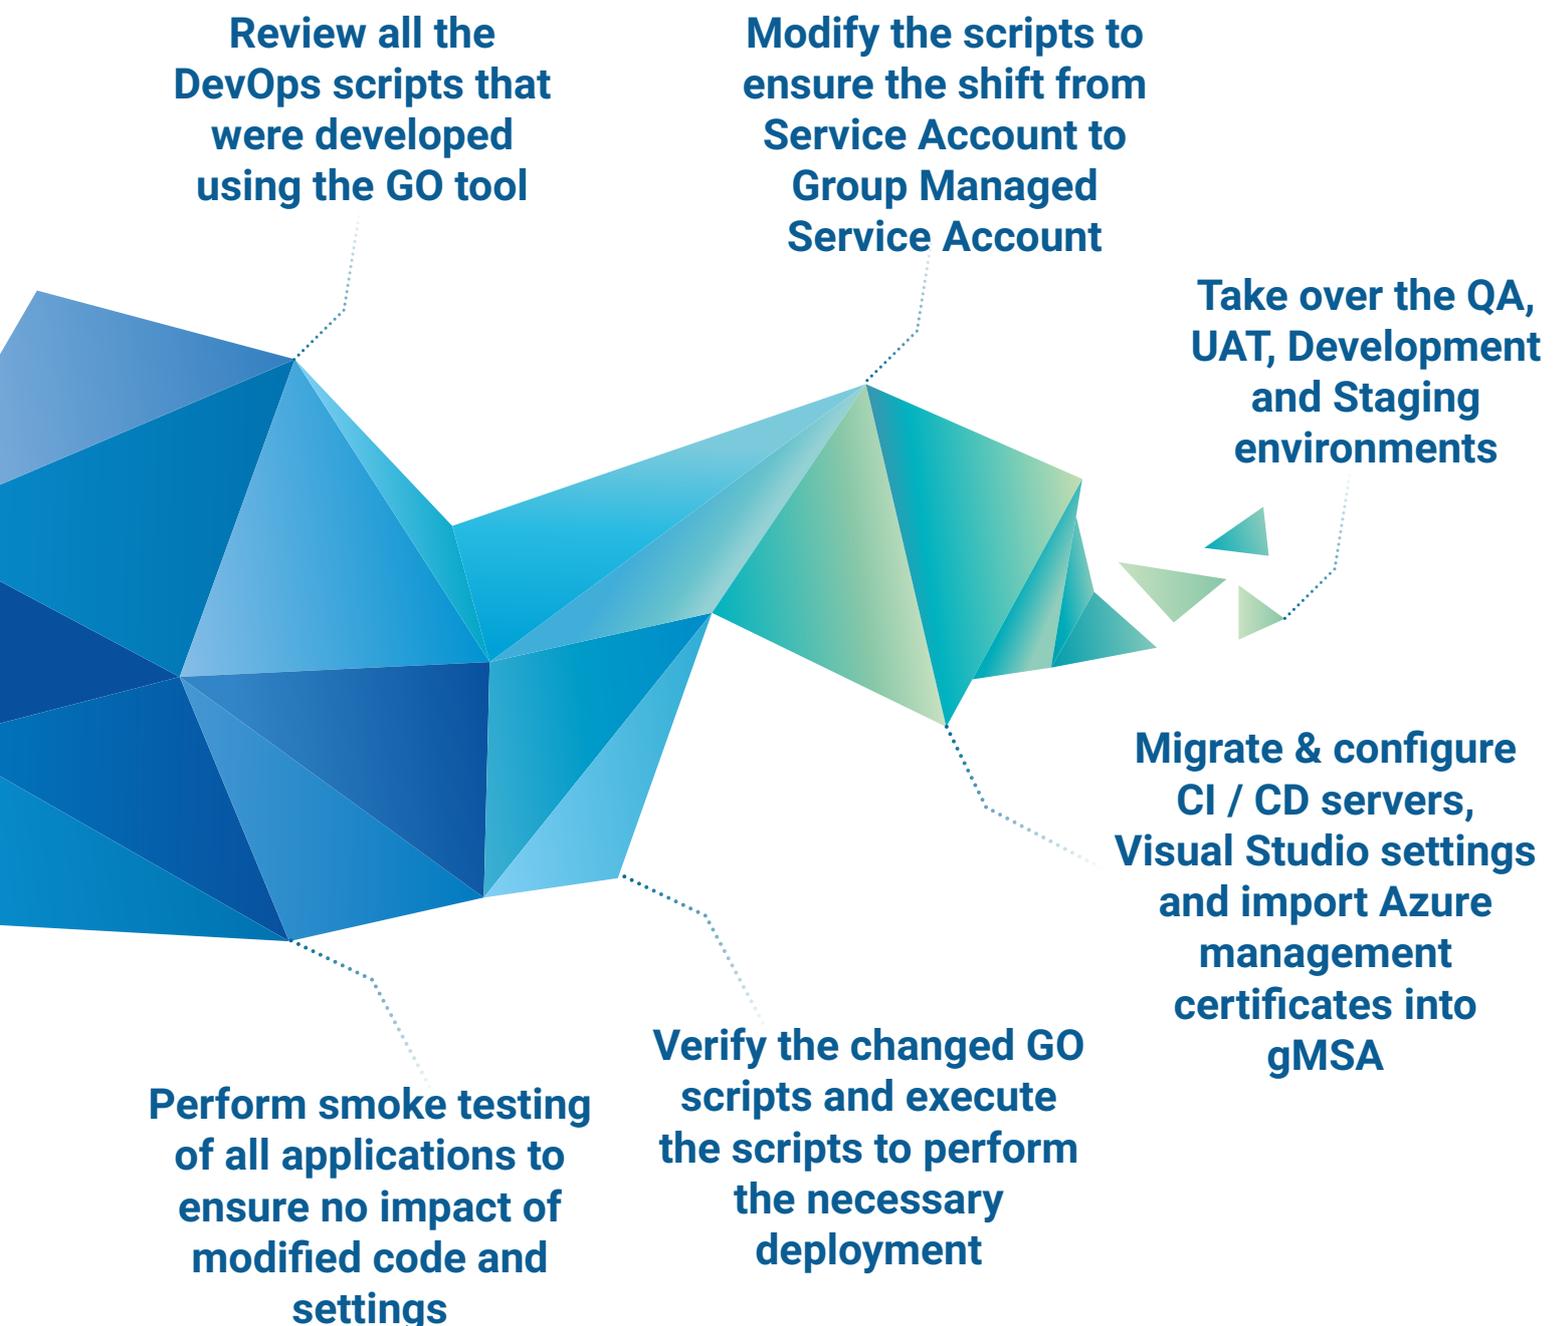

Our customer had embarked on a strategic initiative program to ensure compliance to the regulations included upgrading their AWS Instance Operating Systems from Windows 2008 R2 to Windows 2012 R2 and shifting from the traditional Service Account to group Managed Service Account (gMSA).

The initiative included upgrading OS for password remediation and implementing DevOps with a rigorous QA cycle. Password Remediation is an ITS-initiated program that requires service account passwords be changed at least on an annual basis. Manual rotation (even if parts have been automated), requires extensive effort and testing.

# How did we help our client solve the issue?

Quinnox was chosen as the DevOps partner after an evaluation of many vendors, mainly due to our DevOps capabilities and familiarity with the technology stack, as well as deep knowledge of DevOps frameworks, methodologies and practices.

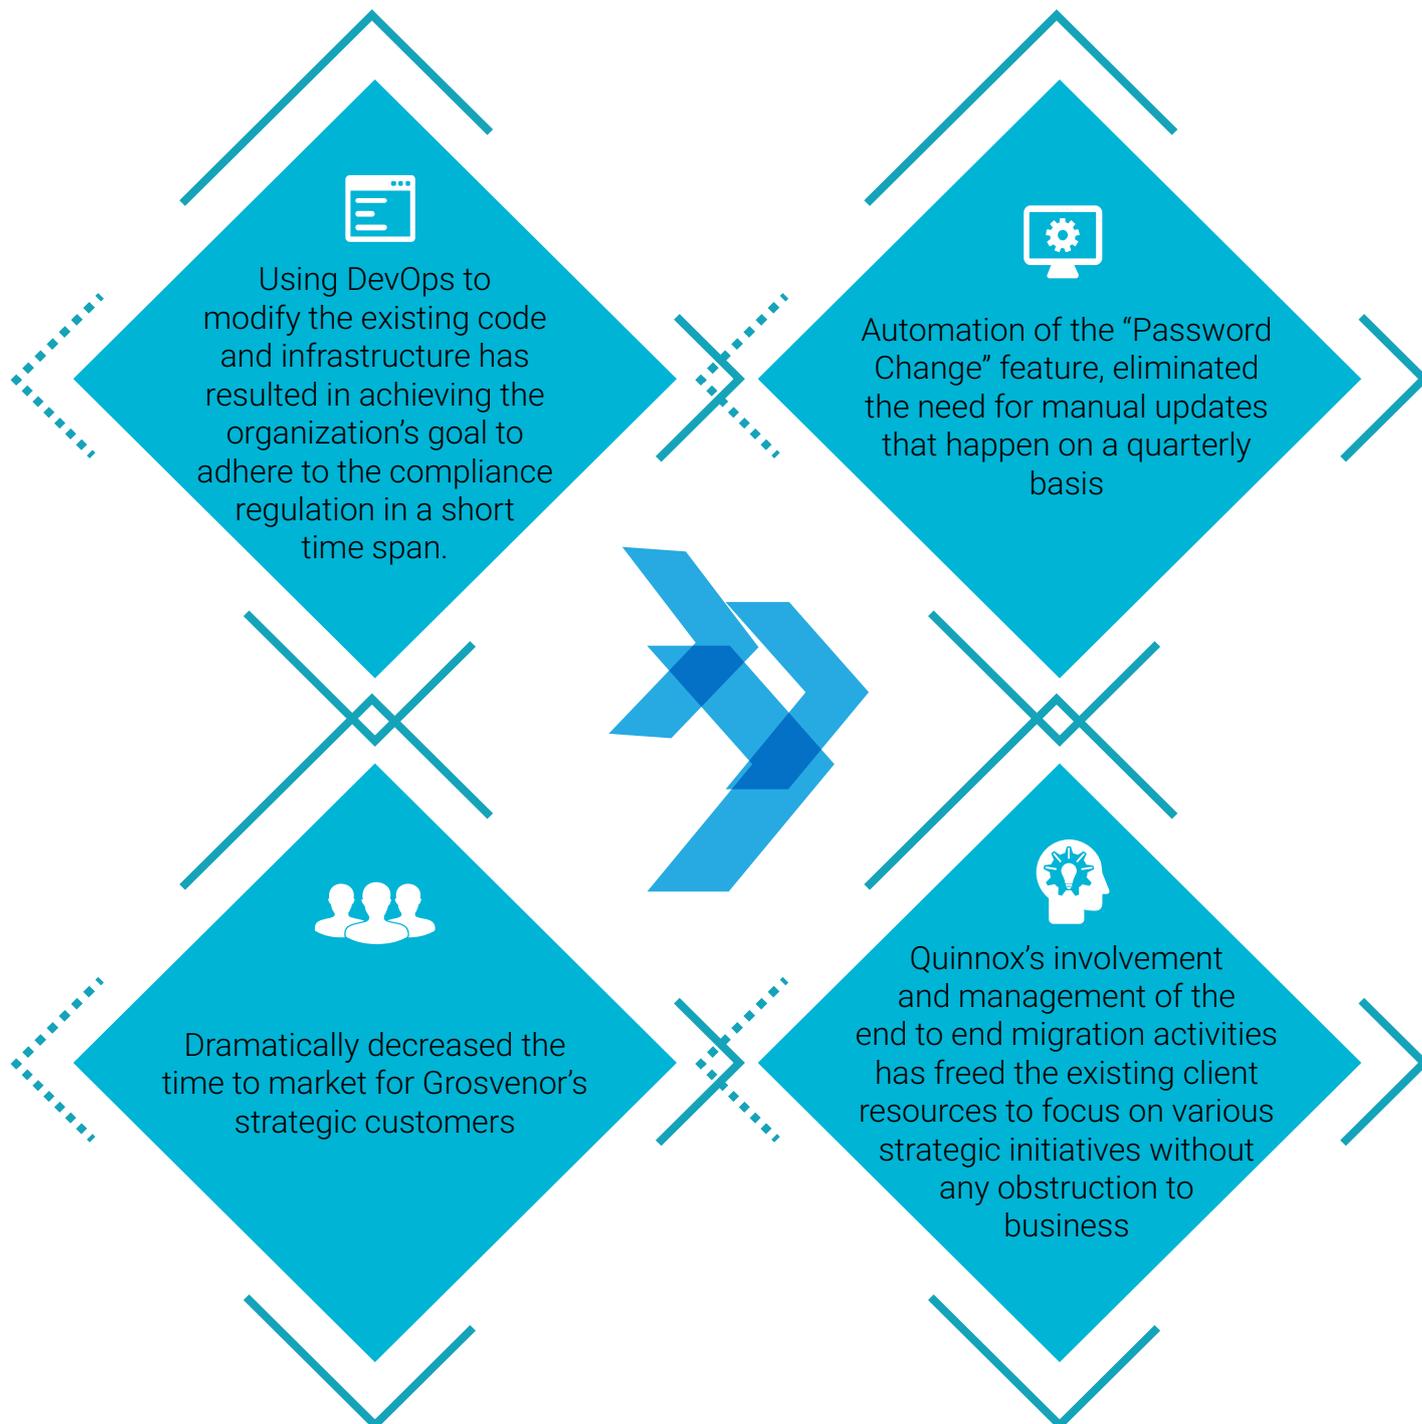

The Quinnox DevOps team worked closely with the financial institution's team to modify the existing DevOps deployment scripts. Our approach included implementing DevOps using tools such as GitHub, Visual Studio 2015, Team Foundation Server TFS, Source Tree, AWS EC2 Instance, GO CD - Open Source Continuous Delivery.

# What were the business values uncovered?

The above mentioned approach ensured the successful completion of end to end migration within 3-4 months.

**Here are some of the key points appreciated by our client:**

## About Quinnox

Quinnox is an AGILE technology-driven business services enablement partner to forward-thinking enterprises. We drive digital business value, enable industry platforms and solutions, and simplify business processes. Quinnox has engaged in several major verticals, with expert teams that have highly specialized industry experience in financial services, manufacturing, and retail and consumer goods. As a midsize company, we focus on helping customers benefit and gain a competitive advantage from our "sweet spot" in unmatched expertise and enhancing the customer experience.
