

CONQUERING INTEGRATION CHAOS FOR CONNECTED ENTERPRISES

A democratized approach to
business operations governance,
integration and risk management.

THE CHALLENGE

As the global market evolves and grows, large and mid-size organizations will continue to have a plurality of integration platforms. Managing and consolidating multiple integration platforms will prove a herculean task for IT leaders. As a result, organizations must push beyond IT-centric forms of Ops and embrace BizOps to maximize business outcomes.

Which raises the question - how do you manage and maintain a fast-growing ecosystem of integration platforms without causing budget overruns and increased dependency on people and skillsets while delivering value to the business?

**Low visibility
and compliance**

Outdated documentation of integration services and APIs ultimately lead to downstream impact.

High opex

Growing complexities in an increasingly complex IT landscape require dedicated specialized teams.

**Slow
consolidation**

Consolidation is a labor-intensive, error-prone, and human-dependent rationalization initiative.

**Low
governance**

Manual governance presents challenges; hence, the enforcement of guidelines appears cumbersome.

**Non
realtime**

Complex setup and low visibility make it difficult to scale with growing data and connectivity requirements.

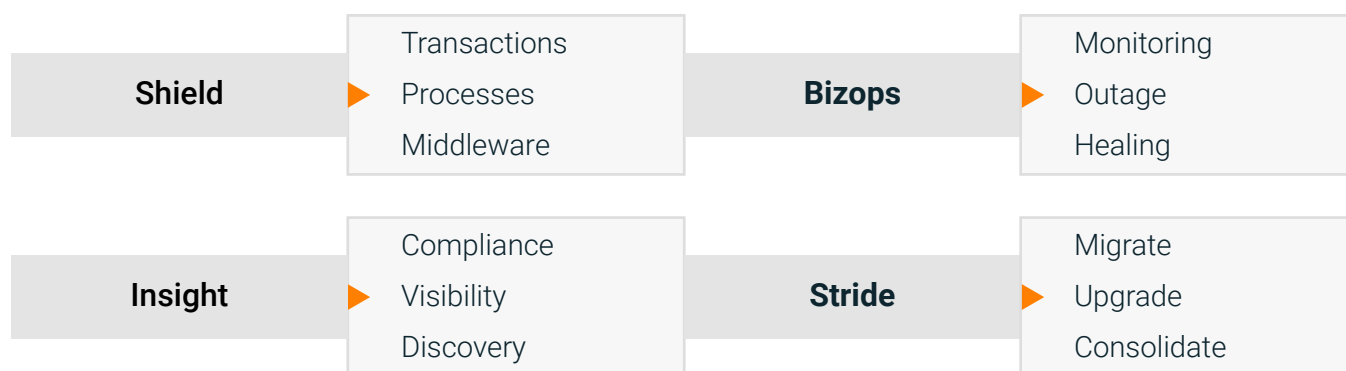

THE QOALESCCE WAY

In an increasingly growing and historically fragmented Integration marketplace, Qoalesce ushers in a democratized integration delivery model to offer a never-before-seen, low-code platform to help organizations simplify, automate and optimize Biz operations. It is a non-intrusive, vendor-agnostic platform that will manage, monitor and govern your broad portfolio of integration processes.

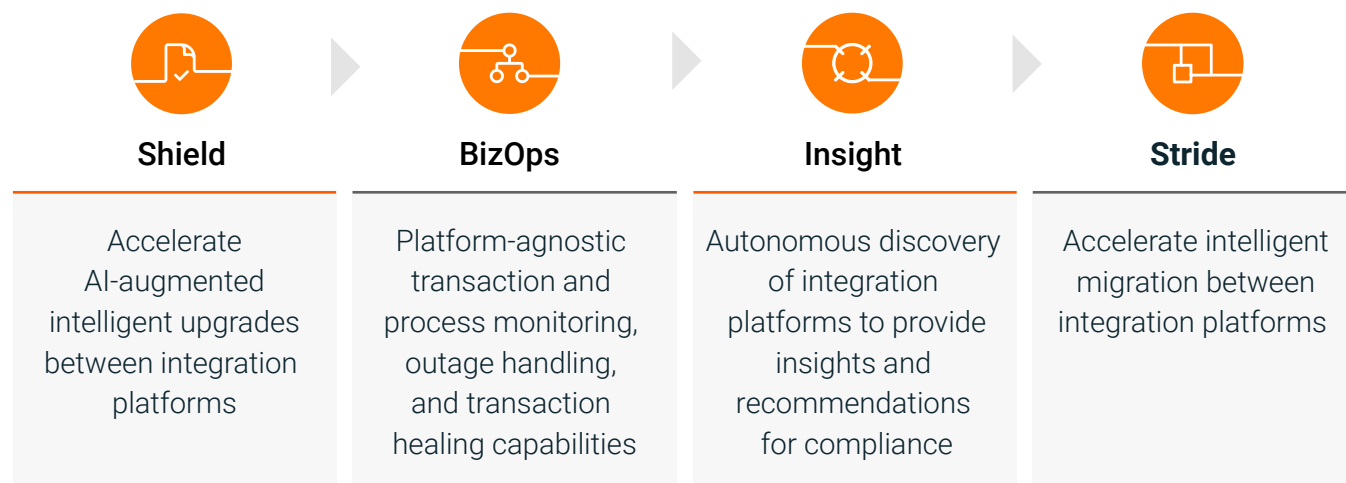

This platform results from **20** years of industry practice and **50,000** person-hours enhancing integration capabilities of **50+** Fortune **500** organizations. Our best minds have come together to reimagine BizOps for accelerated business outcomes.

Reimagine BizOps for Connected Enterprises

POWER OF QOALESCCE

WHY QOALESC

Exceptional business process observability

Significant cost savings and an enhanced unified view for the leadership, business, and operation teams lead to faster implementations and fewer operational errors and risks.

Better governance

Intelligent discovery and analysis of business processes lead to better ROI impact and real-time visibility into your business operations with lower dependency on specialists in IT and business.

Reduced risk of disruption

Better compliance with end-to-end validation & continuous governance leads to lower risks to business process enhancements. Real-time monitoring of data in flight reduces risks from systems outages.

Accelerated time-to-market

Embrace platform for error-free build and deployment for faster turnaround time to drive digital adoption, new features, and process implementation and re-engineering.

Qoalesce has provided a single platform to validate and monitor our growing business processes across our organization worldwide. It allows us to effectively govern the increasing complexity of our rapidly growing business and integration landscape and provides a central repository for data-driven decision-making.

Director-Integration, FMCG giant

About Quinnox

Quinnox is your agile, business-results-driven digital technology partner. With the power of human and applied intelligence, we simplify business processes, improve customer experiences, and create exceptional business value for forward-thinking enterprises. With the combination of cognitive solutions, conversational platforms, SaaS solutions, human and applied intelligence, we capitalize on new technologies to accelerate growth, innovation, efficiency, and resilience. Our data-driven digital solutions unlock the hidden potential of your business across your digital value chain, helping to accelerate success, today and tomorrow.
